PROFESSIONAL SUMMARY

Software Engineer specializing in **PHP (Laravel 6 - 12 , Symfony 5 - 6, CodeIgniter)** with 5+ years of experience building modern web applications. Strong frontend expertise in **Vue.js** and **React.js** using **Inertia.js** and **Livewire**. Proven background in **RESTful APIs, authentication, real-time UI, Docker-based development, CI/CD pipelines, LAMP stack,** and cloud deployments on **AWS** and **DigitalOcean**, delivering scalable, secure, and maintainable systems using clean architecture and best practices.

WORK EXPERIENCE

Propelrr

Software Engineer

JAN
2024
-
MAR
2025

- Developed and maintained **Symfony PHP** applications using **MVC** architecture, **reusable services, event listeners/subscribers**, custom **Twig** extensions and **Tailwind CSS**.
- Designed and implemented **RESTful APIs** using **Doctrine ORM**, managed **MySQL** database schemas, migrations, and **optimized queries** for performance, scalability, and data integrity.
- Built secure, role-based admin panels leveraging **Symfony Security**, integrating **payment gateways, SEO** tools, cloud services (**AWS/DigitalOcean**), and social authentication.
- Created **SEO-friendly** frontends with **Twig**, developed complex **Symfony** Forms with custom validation rules, and ensured application reliability through **PHPUnit** unit and functional testing.
- Managed **Git-based** workflows (**branching strategies, pull requests, code reviews**) and executed **CI/CD** pipelines with automated testing and deployments, collaborating with cross-functional teams to deliver projects on time.

HiveLabs Tech.

Software Developer | Lead | Mentor

JUL
2020
-
DEC
2023

- Developed and maintained full-stack applications using **Laravel (Blade, REST APIs)**, **Symfony** Twig, and modern frontend frameworks **Vue.js, React.js** and libraries like **Bootstrap** and **Tailwind**, applying **clean code principles**, responsive **UI/UX**, **scalable architecture**, and **reusable components**.
- Designed, built, and consumed **RESTful APIs** in **Laravel**, implementing secure authentication using **Laravel Passport, JWT**, and **OAuth2**, and handling background processing with **queues, jobs**, and **events**.
- Led integrations of **third-party APIs** and services, including **PayPal, GCash, PayMaya, BUX, PayMongo, Klook API, SMTP, POP3, AWS S3, Firebase, Google Analytics**, and **social login** providers, ensuring secure and reliable data flow.
- Managed **Git-based** workflows and automated **CI/CD pipelines**, deploying and maintaining applications on **AWS EC2** and **DigitalOcean** environments.
- Acted as **team lead** and **mentor**, facilitating **scrum** meetings, **mentoring** junior developers, conducting **code reviews**, and collaborating with **cross-functional teams** to **enforce coding standards, best practices**, and **delivery timelines**.

WORK EXPERIENCE

WEBX ASIA

Software Developer

JUN
2019
-
DEC
2019

- Developed, tested, and maintained enterprise-grade web applications using **Laravel Lumen**, leveraging **Eloquent ORM**, **Blade templating**, and service container for scalable, high-performance **APIs**.
- Architected **RESTful APIs** and **microservices** with **Laravel Passport** for **OAuth2** authentication, **middleware** for request filtering, **API** versioning, and robust role-based access control (**RBAC**).
- Managed **MySQL** databases using **Laravel migrations**, **seeders**, **factories**, and **query builder** to ensure data integrity and smooth schema evolution.
- Built modular, reusable **Angular 5 components** and **services**, **utilizing reactive forms** and **NGRX** for efficient **state management**, fully integrated with **Laravel backend APIs**.
- Utilized **Git** for source code management, branching strategies, and integrated with **CI/CD pipelines** for seamless collaborative development.
- Delivered cross-browser compatible, **mobile-responsive front-end** solutions with **Angular 5**, ensuring optimal user experience across all devices.
- Maintained comprehensive project documentation, implemented **unit** and **functional testing** using **PHPUnit**, and actively contributed to **code reviews** and team knowledge sharing.

Freelancing

Software Developer / Project Manager / BA

MAY
2019
-
APR
2020

- Designed, developed, tested, and maintained responsive web applications using **Laravel**, **CodeIgniter**, **RESTful APIs**, **Bootstrap**, and **Tailwind CSS** for modern, **mobile-first** interfaces.
- Managed **sprint planning**, **Agile workflows**, and **risk mitigation** to ensure on-time delivery of high-quality software that met client requirements and expectations.
- Collaborated with stakeholders to gather requirements, translate business needs into detailed technical specifications, and maintain thorough project documentation.
- Worked extensively with **MySQL** and **MongoDB** databases, integrated **cloud services** like **Firebase** and **AWS**, and implemented **asynchronous data handling** using **JSON/AJAX** techniques.
- Ensured application security and robustness by applying **Laravel's built-in authentication**, **middleware**, and **validation features**, and **implemented comprehensive testing strategies**.
- Collaborated **cross-functionally** with designers, QA, and product teams to deliver standards-compliant, scalable, and maintainable features.

Techvision ICT Solutions

INTERNSHIP

MAY
2018
-
AUG
2018

- Created responsive **HTML/CSS** templates and ensured cross-browser compatibility.
- Designed and developed **WordPress** pages and components aligned with branding and usability standards.
- Provided **web support** to **teams** and **clients**, resolving inquiries and **technical issues**.
- Identified, tested, and reported website bugs, collaborating with developers for fixes.
- Contributed to **UI/UX** improvements, updates, and performance optimizations.
